

DIGITAL META PTE. LTD

I-Meta Portable Fusion Tracer Disruptor

Experience a versatile solution for comprehensive drone defense with our lightweight and user-friendly device. Detect drones in all directions and pinpoint their location accurately while providing full-band suppression across all frequencies. Ideal for security professionals, military, and police, this high cost-performance device offers exceptional value.

Detection Performance Indicators

-  **Coverage:** Detects racing drones, DIY drones, and the full range of DJI drones within a 1-3 km radius.
-  **Alarms:** Triggers audio-visual alarms upon detection.
-  **Detection Technology:** Utilizes spectrum and protocol analysis for precise identification.
-  **Covert Operation:** Operates without emitting any signals, ensuring discreet usage. Take control of your airspace with this advanced, portable technology.

Jamming Performance Indicators

Our newly designed drone jammer module features advanced high-efficiency GaN (Gallium Nitride) transistors, which significantly reduce heat generation and improve operational efficiency.

-  **Modular Design:** Allows flexible addition, reduction, or replacement of modules to cater to various application needs.
-  **Built-in Alarms:** Includes low power and high-temperature alarms for constant status monitoring.
-  **Efficiency and Reliability:** Enhanced operational efficiency and reliability with reduced heat generation.
-  **Flexible Expansion:** Offers scalable expansion capabilities and comprehensive status monitoring.
-  **Market Effectiveness:** Effective against most drones available on the market. This advanced jammer module provides stable and reliable protection, making it an ideal choice for modern drone defense applications.
